

Abstract de la presentation endoscopic vs surgical treatment of VUR
By Dr. Paul Daher

We present the latest literature data regarding vesico- ureteral reflux surgical treatment comparing between the endoscopic and the reimplantation technic results.

The endoscopic treatment has shown after many experience years, a lake of long term sustainable results with high recurrence rate and higher cost than usual surgical technic especially the cohen neo cystoureterostomy .

Abstract de la presentation du KT DP By Dr. Paul Daher

Peritoneal dialysis (PD) is essential to maintain the residual renal function in children till they reach puberty. Thus, in this presentation, we will share our experience of 30 patients to discuss PD placement techniques (open vs laparoscopic) and related complications.
